

## FREE DEMONSTRATION

**Gaussian Wellworks** offers a complimentary trial analysis to demonstrate the application of the Gaussian method using client-provided data in accordance with the **Engagement Protocol**.

The trial enables prospective clients to evaluate the quality of insight, clarity of deliverables, and relevance of the methodology before committing to a broader engagement.

## WHAT THE TRIAL CAN DEMONSTRATE

|                                                                                                  |                                                                                      |                                                                                      |                                                                                             |
|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| <b>FRACTURE HALF-LENGTH</b><br>Estimate effective fracture dimensions from available field data. | <b>PRODUCTION PERFORMANCE</b><br>Characterize well behavior and production response. | <b>RESERVOIR INSIGHT</b><br>Extract practical subsurface insight from existing data. | <b>METHOD COMPARISON</b><br>Show the practical difference from conventional interpretation. |
|--------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|

## WHY START WITH A DEMONSTRATION

|                                                                                  |                                                                                     |                                                                                         |
|----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| <b>NO-COST EVALUATION</b><br>Evaluate the approach with zero upfront commitment. | <b>LOWER FINANCIAL RISK</b><br>Test relevance before considering a broader rollout. | <b>LOW-PRESSURE ENTRY</b><br>A clear, practical starting point for prospective clients. |
|----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|

## OUR GOAL

|                                         |                                              |                                                      |                                          |
|-----------------------------------------|----------------------------------------------|------------------------------------------------------|------------------------------------------|
| <b>VALIDATE GPT</b><br>on client assets | <b>DEMONSTRATE</b><br>key technical insights | <b>BUILD CONFIDENCE</b><br>through proof, not claims | <b>SUPPORT</b><br>value-driven decisions |
|-----------------------------------------|----------------------------------------------|------------------------------------------------------|------------------------------------------|

**CLIENTS EVALUATE THE WORK ON THEIR OWN ASSET, WITH THEIR OWN DATA, IN A REAL DECISION CONTEXT.**

## WHAT CLIENTS CAN EXPECT

|                                                                                                                 |                                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|
| <b>CLEAR, PREDEFINED DELIVERABLES</b><br>Agreed work products and success criteria established before analysis. | <b>SECURE DATA HANDLING</b><br>Structured transfer and handling protocols aligned with the Engagement Protocol. |
| <b>TRANSPARENT PRESENTATION</b><br>Methodology, assumptions, and results communicated clearly.                  | <b>ACTIONABLE INSIGHTS</b><br>Findings focused on practical decision support.                                   |
